## Let's teach our parents to use social media

We young people use social media because it is much easier and it is current and it is spreading much faster than TV programs. But you have to be careful because sometimes wrong news will be spread. Of course this can also happen with news on television and the news paper but it is less likely because they normally check their sources where they get their news from carefully. If you make sure but the information is correct from the social media its more updated and the most modern way.

Take your parents and grandparents by the hand and show them how to use instagram, Twitter and Facebook!
