

**Fake news**

# Fake news

**Fake news is misinformation spread purposefully mainly through social media or news stations. Fake news are meant to seem neutral, but in reality they are spread to influence you in some way. Fake news are mainly spread to make money or influence your viewpoints and opinions.**

# Real news

**Real news are not manipulated in any way. Real news contains only true information.  
They are spread to inform people of what is happening around the world.**

# There are two main types of fake news:

## Type one

flashy ad revenue  
shocking draw people in  
surprising

## Type two

Influence  
Manipulation Out of context  
Changing information

# How to avoid fake news

**Whenever you come across news you should always ask yourself a few questions before believing them.**

**Taking the time to make sure the news you're consuming are true will prevent you from spreading hurtful information.**

**Here are some key points on how to avoid fake news:**

# Emotion

**Emotions can distract you from the truth.**

- **Using emotions in news is an easy way to make you believe something.**
- **Humans believe news much faster if the news align with their own opinions.**
- **Are the news neutral or are they trying to convince you?**
- **Trust your gut.**
- **There is a difference between opinions and facts.**

# Titles

**Titles can be deceiving. Often titles are brief or imprecise to make something seem more reliable than you can actually prove.**

- **Phrases like “scientists say” or “new research”**
- **Titles that are too long**
- **Bad formulation**
- **Bad grammar**

# Manipulation with fake news

## Who can gain something?

- **Is there a clear political viewpoint?**
- **Are the news connected to a specific product?**
- **Are the news centered around conspiracy theories?**

Think for yourself. What can people spreading misinformation about the COVID-19 pandemic gain?

# Source

- **Does your source usually write about similar news?**
- **Who is writing these news?**
- **Is the source official?**
- **Do other sources say similar things?**
- **Does it seem like the pictures are taken specifically for the article you're reading?**
- **How old is your information?**

# Let's play a game!

**Raise your hand if you think these  
news are real**

FREE YOUR MIND

# Scientists say your “mind” isn’t confined to your brain, or even your body

# FDA Announced That Vaccines Are Causing Autism

According to the FDA's online Biologics Blood Vaccines document, a vaccine manufacturer admits on its package insert that their vaccination can cause autism as one of many adverse reactions.

These adverse events reported during post-approval use of Tripedia vaccine include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea. Events were included in this list because of the seriousness or frequency of reporting. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequencies or to establish a causal relationship to components of Tripedia vaccine.

**Additional Adverse Reactions:**  
• As with other aluminum-containing vaccines, a nodule may be palpable at the injection sites for several weeks. Sterile abscess formation at the site of injection has been reported.<sup>3,36</sup>  
• Rarely, an anaphylactic reaction (ie, hives, swelling of the mouth, difficulty breathing, hypotension, or shock) has been reported after receiving preparations containing diphtheria, tetanus, and/or pertussis antigens.<sup>3</sup>  
• Other type hypersensitivity reactions characterized by severe local reactions (especially starting 2-8 hours after an injection)

### People Who've Done Their Own Research Warn of Microchips Found in Ivermectin

Posted By Pete Kotz Email Us! on Mon, Sep 27, 2021 at 9:00 am

National Cancer Institute/Unsplash

Microchips everywhere?

Among true Americans who think for themselves, ivermectin is considered a miracle drug. Prior to the pandemic, it was commonly used to treat worms in horses and other livestock. Then amateur physicians discovered what all of medicine had missed: It could also cure Covid-19. **Though users died at 11 times the rate of those who've been vaccinated**, it allowed patients to forego the "needle rape" pushed by the Doctor Cartel.

Now the cartel is fighting back. According to the Society of People Who've Done Their Own Research, microchips have been found in ivermectin. The societv. composed of people who can scan the internet and instantly master

## High Recorded Mortality in Countries Categorized as “Covid-19 Vaccine Champions”. The Vaccinated Suffer from Increased Risk of Mortality compared to the Non-vaccinated

Data on Mortality in the Most Vaccinated Countries. Increased Hospitalizations of the Vaccinated

*Since the beginning of the health crisis, the French government has claimed that early treatment was ineffective. It has imposed major restrictions on our freedoms, in particular on doctors' prescriptions,[1]*

*It has also promised that vaccination would achieve collective immunity, the end of the crisis and a return to normal life.*

*But the failure for 18 months of this so-called “health strategy” based on false simulations, innumerable lies, promises never kept, as well as the propaganda and fear campaign has become unbearable.*

*In turn this has been followed by **the extortion of consent** to be vaccinated, by outright blackmail, while curtailing our freedoms to move and socialize, our right to work and engage in leisure activities.*

*Are the current vaccines that they want to impose on us effective?*

*Can they lead to a collective immunity or is it only a myth? To answer this question, **we will make the current sanitary assessment of the most vaccinated countries** according to the figures provided by the World Health Organization and the curves of *OurWorldinData*. (From Vaccine outset in December 2020 to September 15, 2021)*

### Record mortality in Gibraltar, champion of Astra Zeneca injections

Gibraltar (34,000 inhabitants) started vaccination in December 2020 when the health agency counted only 1040 confirmed cases and 5 deaths attributed to covid19 in this country. After a very comprehensive vaccination blitz, achieving 115% coverage (vaccination was extended to many Spanish visitors), the number of new infections increased fivefold (to 5314) and the number of deaths increased 19fold. The number of deaths increased 19-fold, reaching 97, i.e. **2853 deaths per million inhabitants, which is one of the European mortality records**. But those responsible for the vaccination deny any causal link without proposing any other plausible etiology. And after a few months of calm, the epidemic resumed, confirming that **115% vaccination coverage does not protect against the disease**.
